*Ensuring the quality in higher education system it is a actual problem in European Union countries and also the countries found in pre-adher system, it becomes more important because in every country from Europe, the executive structures of government act, connects the academic quality evaluation to finance aspect and especially to her's level.*

*The problem of Quality in Higher Education, on conceptual, structural and organizing aspect becomes more and more an european and an international problem. It appears, logically, a new problem: development of a new type of international Management in education domain who must lead at the creation of that Higher Education space, and also to promote performance in competition condition.*
