

QUALITY – ENVIRONMENT – OCCUPATIONAL HEALTH AND SECURITY, DISTINCT OR INTEGRATED SYSTEMS?

Daniela Simona MOLDOVAN*

Abstract:

Implementing and maintaining quality, environment, occupational health and security management systems, either distinct or integrated, in accordance with ISO 9001:2000, ISO 14001:2004, should be a strategic decision of every organization in order to be able to evaluate its real potential and to improve performances in this field of activity.

This paper presents the similarities and the differences between the above mentioned management systems, considered to be useful for accomplishing quality, environment, occupational health and security requires and also for pointing out a more efficient way for implementation.
