Abstract: *The domain concerning the energy production from the renewable sources of energy, is a very discussed domain. As a proof, since we adhered in EU, and this means to their requests, we need to pay more attention to the standards and legislation concerning the renewable sources, it became a request, and also a necessity, to develop such equipments and instalations which product energy. The various reasons for which we need it, we have enumerated in this article. As a consequence is need it to know these standards.*
