

THE 11th INTERNATIONAL CONFERENCE
ON QUALITY AND DEPENDABILITY
CCF 2008 – A MAJOR EVENT IN THE FIELD

Dan G. STOICHIȚOIU*, Ioan C. BACIVAROV**

Abstract: *In the first part of the paper, the coordinators of CCF2008 present the evolution of the CCF conferences, which became an important international forum for the dissemination of recent information and scientific results in quality and dependability. In the second part, they present the objectives and the topics of CCF2008. They mention that several debates of CCF2008 will be dedicated to the evolutions in the European quality on the European scene during these last years, as well as to the national evolutions in this field. The real integration of Romanian economy in the unified European structures is an impossible endeavour unless the severe requirements on quality based on the EU's standards are met. The International Conference in Quality and Dependability – CCF is now a well established brand of excellence among the international scientific meetings in the inter-disciplinary field of quality and dependability.*

Key Words: *Quality, Dependability, International Conference, EU policy.*
